

Pilot Rock

A FULL TANK OF GAS IS REQUIRED PRIOR TO DEPARTURE*

Requirements:Rated—Tough (Black) Minimum 32” tires and a locker required. Low ground clearance vehicles are likely to get scraped on the rocks.

Description:Highway driving will be required to and from the trail. There will be an opportunity to air down at the trail head. The 2n17X/ Pilot Rock Trail can be as challenging as you want to make it, especially when run from west to east, as we will. Most of the hill climbs have more than one line, with varying degrees of difficulty. The trail consists of steep rutted hill climbs, off camber sections and a few optional rock obstacles near Pilot Rock that will challenge even well set up rigs. The trail starts at Lake Silverwood and runs along the ridge providing great views of Silverwood and the High Desert. There are several options for the trip back to camp ranging from pavement to “most difficult” trails. The trail crew will choose the most challenging return trip that time allows.
