

# John Bull

## Requirements:

Rated- Tough (Black) Minimum 32" tires and 2 lockers required. Low ground clearance vehicles are likely to get scraped on the rocks.

## Description:

Highway driving will be required. There will be an opportunity to air down at the trail head. John Bull, often called the "Mini-Rubicon" is one of the most challenging trails on the mountain. It definitely has some of the best rocks. The trail has been known to challenge even the locked vehicles so if your vehicle is open (no traction device) you may want to consider another trail.

For the night run, please use extreme caution when driving over obstacles.
